

Data center power, cooling

- POWER, COOLING, AND CABLING
- SERVERS, STORAGE, AND NETWORKING
- SECURITY, REMOTE ACCESS
- SOFTWARE, LICENSING, AND MAINTENANCE
- EXPERT PRODUCT FULFILLMENT

No matter how much redundancy you put into your computing and networking infrastructure, the one layer which can take everything down above it is your power and cooling. At CPU we recognize the importance of a solid foundation in power and cooling. That is why we have become New England's leading customer advocate for APC data centers.

Why trust your data center's physical infrastructure to CPU?

Expertise. We are passionate about reducing risk in our clients' data centers and have become experts on power and cooling. We start by gaining a complete understanding of your existing environment, your needs today and your plans to expand in the future. Then we develop a solution that fits within your timeframe and budget.

Knowledge. To us, a successful project is more than just a working physical infrastructure. We believe in helping you understand the process and empowering you with knowledge.

Strength in numbers. Our team consists of data center designers, mechanical engineers and electrical engineers.

Value. As an APC Gold Partner, we are able to offer you the most competitive pricing available. Our project management is comprehensive, taking you from the design phase through project completion

Reliability. In the past few years, we have engaged in hundreds of data center projects with companies including Brown University, Providence College, Bentley College, Cybex International and Aquent LLC.

Key reasons to work with CPU

- Completion of hundreds of successful data center projects
- We bring a diverse team of experts to every project
- Our team is trained to get the most out of what you already have in place
