## Network Security Today

Today's advanced networks allow you to share information with your employees, business partners and customers. Virtual Private Networks (VPNs) allow you to leverage the power and cost advantages of the Internet. But with the advance of these systems and networks comes exposure to losses from viruses, hackers, spyware and other threats. Network performance and employee productivity is threatened by non-business Internet use.

## Access to Security Experts

Benefit from unlimited Tier 3 SonicWALL tech support 24x7x365. Our team of professionals has been trained to provide the highest level of security and services in the industry.

## Pro-Active Security Monitoring

Even while you're sleeping, your network is continuously monitored by our advanced systems. In the event of a breach in your security policy, our personnel are notified and take action immediately. You may also choose which personnel in your organization are notified of various events based on the criteria you choose.

## Management Reports

Benefit from a variety of real-time reports on our Web site that will help you understand and manage your network usage. Reports such as "Top WebSites", "Top Users" and "Bandwidth Usage" help you quickly identify problem areas and reduce your non-essential network usage. Our on-line reports can also help identify user access to inappropriate Web sites.

## Increase ROI

Eliminate the high expense of network downtime, while lowering the cost to monitor and secure your network. Benefit from our team when you need them, without having to pay for full time security experts.

## Risk Free 30 Day Agreement

We are so confident that you will benefit from our services that we give you the chance every 30 days to assess whether it is adding value. If you are not receiving value from us, then we are not earning your business.
